Skills

Technical Skills

Programming Languages

- C / C++
- Python
- Go (Golang)
- JavaScript (ES6+)
- TypeScript
- HTML
- CSS

Backend Development

- RESTful API development
- Request / response handling
- Basic authentication and authorization
- Clean Architecture principles

Frontend Development

- HTML
- CSS
- React (basic)

Databases

- SQL (basic schema design)

Embedded & Vision (Additional Background)

- Embedded firmware development
- OpenCV
- Object detection
- Stereo vision

Career Objective

Aspiring Junior Full Stack / Backend Developer transitioning from a robotics and embedded systems background, with foundations in TypeScript JavaScript and Go, RESTful APIs, system design, and software engineering best practices. Seeking an opportunity to grow within a development team and contribute to scalable software systems.

Work History

Research and Development Engineer

Kasetsart University Kamphaeng Saen Campus
Nakhon Pathom

Responsible for developing and integrating robotic systems using microcontrollers and computer vision technologies. Focused on creating intelligent robots capable of object detection, depth perception, and autonomous decision-making through vision-based algorithms.

- Design, develop, and program robotic systems using microcontrollers (e.g., ESP32, STM32, Arduino, etc.).
- Implement and optimize object detection and tracking using OpenCV and deep learning frameworks.
- Integrate and calibrate stereo camera systems for depth estimation and 3D perception.
- Develop control algorithms for motor control, navigation, and sensor fusion.
- Interface hardware and software modules including motors, encoders, cameras, and communication interfaces (UART, SPI, I2C, etc.).
- Conduct testing, debugging, and performance tuning of robotic prototypes.
- Collaborate with mechanical and software teams to achieve full robot functionality.
- Document development processes, experiments, and technical findings.

Education

2018-5

Bachelor of Engineering: Mechanical Engineering

Kasetsart University Kamphaeng Saen Campus
Nakhon Pathom
